

Trello

trello.com

You can create custom columns like "To-Do" or "In Progress" which you can use to organise individual tasks. The tasks are then added as a small card to the column. For each card you can set a due date, write comments, assign people to it and much more.

Yammer

products.office.com/en-us/yammer/yammer-overview

A social network for business, Yammer provides a platform for you to communicate and collaborate privately with your colleagues. Employees sign in with a company email address and can use the platform via web, desktop or mobile to chat openly or privately and share documents. You can even like somebody's status if you want to!

Dropbox

dropbox.com

This tool allows you to create so-called "shared folders" which appear on every team member's computer. Any file which has been uploaded to these folders can be accessed by every person with access to it.

Slack

slack.com

Using this tool you can sort all of your conversations into different channels. With Slack you get all of this in-stream, so you can discuss with your team who will take on the latest bug or task.

Flatsi.es

flatsi.es

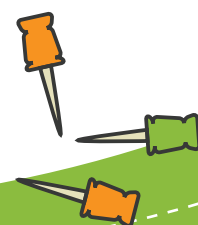

This free tool for designers enables you to host your project on one dashboard and share via a simple URL. Projects are password-protected, so only you and the client have access to them.

Wrike

wrike.com

Wrike is all-in-one project management and collaboration software. It combines social collaboration tools and task management features, keeping everyone in perfect sync so as to get more done faster

Deekit

deekit.com

This is a shared whiteboard for remote teams.

Fleep

fleep.io

The next-generation messenger designed to make your life easier by empowering you to chat without boundaries and work smarter. It merges emails and messages, grouping them together with the relevant files. Fleep channels everything you need into one place.

Pipedrive

pipedrive.com

This free tool for designers enables you to host your project on one dashboard and share via a simple URL. Projects are password-protected, so only you and the client have access to them.

Quick MVP

quickmvp.com

QuickMVP is the easiest way to test your ideas, without wasting time or money.

Toggl

toggl.com

Toggl's time tracker is built for speed and ease of use. Time-keeping with Toggl is so simple that you'll actually use it. Toggl drives a stake into the heart of timesheets.

Lean Startup tools:

producthunt.com/e/lean-startup-tools

Tools to help you validate, build and launch your idea.
